

INDUSTRIAL ENERGY EFFICIENCY AND CHP NORTHWEST QUALIFIED SPECIALISTS

CERTIFIED BY THE U.S. DEPARTMENT OF ENERGY
For states of Alaska, Idaho, Montana, Oregon and Washington

*Prepared by the Northwest Clean Energy Application Center and
the Regional State Energy Offices*

Oct. 1, 2008

Areas of expertise

Steam systems	Process heating
Pumping systems	Compressed air
Fan systems	Clean Heat & Power (CHP)

Introduction

Industrial energy efficiency and CHP encompass a wide range of expertise, analytical software tools and technologies.

The U.S. Department of Energy (DOE) certifies industrial energy specialists as part of their Industrial Technologies Program www.eere.energy.gov/industry/. The northwest states have teamed together with others in the field of industrial energy efficiency, and in partnership with the Northwest CHP Application Center www.chpcenternw.org/ to present this list of DOE Qualified Specialists by area of expertise. Specialty areas include steam systems, process heating systems, pumping systems, compressed air systems, and fan systems. This list changes over time as new people receive their certification.

If you are interested in obtaining training for any of these specialist certifications, visit the DOE BestPractices Training calendar at www.eere.energy.gov/industry/bestpractices/events_calendar.asp. Training sessions of 15 attendees or more may also be coordinated in the Northwest by contacting the Washington State University Extension Energy Program industrial training coordinator, Tamara Parrish at 360-956-2137 or parrisht@energy.wsu.edu.

Energy assessments by specific expert area may be obtained from the individuals/organizations on this list, in some cases at no charge. CHP systems also require expertise to develop projects; for more information on how to access expertise in this area see the CHP contact names listed below.

indicates DOE Qualified Industrial BestPractices Training Instructor
